

Ionic Polymerization and Living Polymers

Filesize: 5.66 MB

Reviews

Complete information for book fanatics. It normally does not cost excessive. I am very easily can get a satisfaction of reading a created publication.

(Mrs. Winifred Fritsch)

IONIC POLYMERIZATION AND LIVING POLYMERS

DOWNLOAD

To download **Ionic Polymerization and Living Polymers** PDF, make sure you follow the web link below and download the ebook or get access to other information which might be highly relevant to IONIC POLYMERIZATION AND LIVING POLYMERS book.

Book Condition: New. Publisher/Verlag: Springer Netherlands | More than simply an up-to-date review of ionic polymerization, this book presents an in-depth and critical comparison of the anionic and cationic polymerization of vinyl monomers and heterocyclic compounds. These different modes of ionic polymerization are examined with regard to their capacity for producing living polymers. The concept of living polymers is re-examined and redefined in light of current knowledge of ionic polymerization and possible side reactions. Throughout, the authors offer perceptive insights into the basic concepts of polymerization chemistry and polymerization reaction mechanisms. The book begins with a review of ionic and radical polymerizations, the development of ionic polymerization, living and dormant polymers, and polymerizability. It goes on to consider important aspects of the structure and properties of ionic species; initiation and propagation of ionic polymerization; polymerization steps other than initiation or propagation, such as termination, isomerization, transfer, backbiting, and degradation; and ionic copolymerization. **Ionic Polymerization and Living Polymers** is a much needed advanced text that will be widely read and referred to by polymer scientists, macromolecular chemists, and materials scientists. | Preface; Introduction: Comparison of ionic and radical polymerizations; Developments of ionic polymerization; Living and dormant polymers; Polymerizability and the monomer--living polymer equilibria; Ionic species: Formation of ions; Ionophores and ionogens, ion-pairs and covalent species; Free ions and ion-pairs; Different types of ion-pairs; Equilibria between free ions and ion-pairs: conductance studies; Heat and entropy of dissociation of ion-pairs; Triple ions; Higher ionic aggregates; Dynamics of interconversions between ionic species; Initiation and propagation of ionic polymerization: General remarks; Initiation and propagation induced by salts; Initiation and propagation involving lithium alkyls; Initiation of cationic polymerization by protonic acids: role of esters (including halides); Initiation of polymerization by Lewis bases and acids: problem of Zwitterions; Initiation of cationic polymerization by Friedel-Crafts reagents with co-initiators;...
