From the INTRODUCTORY SUGGESTIONS AS TO MEDICAL ENGLISH: ONE can read scarcely a sentence of medical English without bumping against the fact that this is a strange sort of a jumblethis iatric language of ours. We find that the structures of the body and its diseases are named by words that are not English. Even in the single-sentence title of an article there will be a hodgepodge of Latin and English. We should protest against this nonsense. Let us anglicize our names of diseases, bones, nerves, veins, and muscles, and quit dragging about with us the tags and barbarisms of medievalism. It is long past the time when the medical snake should have thoroughly sloughed and left behind the old skin of a Latinity that is usually poor philology, sorrier science, and the very superstition of English. There are some terms which it may be difficult to anglicize, but let us force them to come in by any amount of wheedling or by downright compulsion. Take the tables of anatomic parts and with a little good-will all the...
